Guessing you got this too, but just in case.

Cheers,

Adam Kurth

Beginning today, your new account number sets the stage for exciting enhancements for the future!

Good morning Adam,

As previously communicated, we've made a small change to your account number format, **effective today**. While the core number remains the same, the format has been slightly updated to better support upcoming features.

You do not need to update any wiring information on your end (local bank, state, etc.).

Our system has been programmed to ensure that there are no disruptions to your deposits—now or in the future.

Example of the slight change to your account number(s):

Current:
38XXX-101

Effective 5/21/25:
IA01-38XXX-0101

Legacy account numbers will be displayed on your statements and in GPS for at least one year to provide additional support during the transition.

Why This Matters

This change is the first step in a larger upgrade designed to give you more control, more security, and better visibility into your GPS account.

Here's what's ahead as part of this upgrade:

Enhanced Capabilities

- Quickly view all active contacts associated with your account
- Easily add, modify, or remove users
- Manage ACH/Wire instructions (Dual Approval required)
- Create and manage subaccounts directly

Advanced Security Options

- Optional dual approval capabilities for transactions for redemptions and deposits

Expanded Reporting Features

- Request audit trail reports for changes to users, bank details, and transaction approvals

More to Come

This is just the beginning — stay tuned for even more exciting enhancements coming to GPS later this year!

Our team is here to make the transition smooth and seamless. If you have any questions or need assistance, please don't hesitate to reach out to any member of the [ISJIT team](#).

Sincerely,

Paul Kruse
