To: moran.alan@iowacityschools.org moran.alan@iowacityschools.org

Hi Alan,

We are in the process of building the next generation of our School Accounting System. In that endeavor, we are revamping and building a new, dynamic reporting capability in our system. I'm reaching out to some people who I know have used other platforms to share our vision and collect ideas and feedback. I know folks are busy, and I want to be very respectful of your time; I'm curious if you are interested in scheduling a 15 to 30-minute call to share feedback?

Thank you,
Corey

Hi Alan,

Reports attached. The SOC report for our data center that houses our School Accounting System databases (Lumen) is normally made available to us towards the end of Aug/early Sept each year. Technically, this report is not to be shared outside of SUI and our data center partner, but I receive their blessing each year. There is an NDA on this particular report that the independent auditing firm included as part of the report.

The data center that houses all of the documents in K12Docs (Expedient) is normally about the same cycle each year. They have the publicly available version (Type 3) that I can readily share.

I send out an email notification to all customer each year (normally in Sept) with the SOC reports, should districts need this for their auditors.

Hi Alan,

SUI does not currently conduct an internal SOC audit, as all production data rests in our respective cloud infrastructure(s), which are managed services. So far, the auditors have only been asking for SOC reporting for the respective data centers. As the SOC reporting is not a legal requirement, SUI has not yet deemed it crucial to incur the annual expense (which typically gets passed to customers). If it does become necessary for us to conduct an internal audit in the future, we will take the necessary steps.

Unfortunately for me, this is a requirement. This is the first time I have worked with an ERP that has not conducted an annual SOC audit and is outside my comfort level for risk management, and as a former auditor it was standard procedure that we would ask for these. As a result, we will be starting the process to issue an RFP on our accounting system. We are of course happy to include you in the proposal process, however one of the requirements will be an annually completed SOC II report.

Corey,

Can you please send me a copy of your most recent SOC reports? We requested this, but were only provided with a copy for your Co-located Data Center.

Thank you,

Alan Moran, CPA

Hi Alan,

We are in the process of building the next generation of our School Accounting System. In that endeavor, we are revamping and building a new, dynamic reporting capability in our system. I'm reaching out to some people who I know have used other platforms to share our vision and collect ideas and feedback. I know folks are busy, and I want to be very respectful of your time; I'm curious if you are interested in scheduling a 15 to 30-minute call to share feedback?

Thank you,
Corey

I understand, Alan. This is the first time we've been asked about an internal SOC2 audit. We'll certainly explore this further.

Please feel free to include SUI in the RFP process.

Unfortunately for me, this is a requirement. This is the first time I have worked with an ERP that has not conducted an annual SOC audit and is outside my comfort level for risk management, and as a former auditor it was standard procedure that we would ask for these. As a result, we will be starting the process to issue an RFP on our accounting system. We are of course happy to include you in the proposal process, however one of the requirements will be an annually completed SOC II report.

Hi Alan,

SUI does not currently conduct an internal SOC audit, as all production data rests in our respective cloud infrastructure(s), which are managed services. So far, the auditors have only been asking for SOC reporting for the respective data centers. As the SOC reporting is not a legal requirement, SUI has not yet deemed it crucial to incur the annual expense (which typically gets passed to customers). If it does become necessary for us to conduct an internal audit in the future, we will take the necessary steps.

These look like they are for your service providers, we are looking for the SU SOC report. Does SU not conduct a SOC audit?

Hi Alan,

Reports attached. The SOC report for our data center that houses our School Accounting System databases (Lumen) is normally made available to us towards the end of Aug/early Sept each year. Technically, this report is not to be shared outside of SUI and our data center partner, but I receive their blessing each year. There is an NDA on this particular report that the independent auditing firm included as part of the report.

The data center that houses all of the documents in K12Docs (Expedient) is normally about the same cycle each year. They have the publicly available version (Type 3) that I can readily share.

I send out an email notification to all customer each year (normally in Sept) with the SOC reports, should districts need this for their auditors.
